PROJECTS

Expense Management System
Tool: Mongo db, Express js, React js, Node js

2023

Developed a comprehensive Expense Management System to streamline and optimize the process of tracking and managing expenses for individuals and organizations. Leveraging the MERN (MongoDB, Express.js, React.js, Node.js) stack, this web-based application provides users with intuitive interfaces for inputting, categorizing, and analyzing expenses, enhancing financial transparency and efficiency.

Parkinson's Diesease Detection
Tool: HTML,CSS,Javascript,Python

2022

This project implements a web application for predicting Parkinson's disease based on patient data. The application utilizes an XGBoost machine learning model trained on clinical measurements. Users can input relevant data through a user-friendly form, and the model provides predictions regarding the likelihood of Parkinson's disease.

AREA OF INTEREST

- Web Developement

- UI/UX
